Research Details :

Research Title : EFFECT OF EXTERNAL BLEACHING AGENT ON THE BOND
EFFECT OF EXTERNAL BLEACHING AGENT ON THE BOND

Descriptipn : This investigation evaluated the effect of an In office bleaching regimen on the shear bond strength composite resin to bleached enamel with 25% hydrogen peroxide gel (lower concentrated than commonly used). Sixty five freshly extracted human incisor teeth were used in this study. They were divided into three groups of 20 teeth each.

Research Type : Thesis
